**Evaluation Sheet** *Program Material:*_____

***Ranking Guide***
Rank each item relative to the uncompressed signal. If no change for a given attribute is observed, rank zero.
**Intelligibility** (-5, muddier to +5, clearer)
Ability to distinguish distinct sounds from one another, such as words, notes, or other separate sounds.
**Apparent Size** (-5, smaller to +5, larger)
Apparent size of the image across the sound stage, which can vary from localized/small or encompassing/large.
**Presence** (-5, further to +5, closer)
Relative distance of the image from the listener, far/background or near/foreground.
**Dynamics** (-5, none to +5, fuller)
Observed dynamics (difference between loud and soft portions of the program material).
